# Report Writing with AI

This prompt will help you to create base level (high, medium, low) comments. Ideally, you will use these comments as a base and add specific achievements, quotes, or experiences of students to personalise the report.

Your school's reporting or style guide can be a great addition to your persona

Best practices for safeguarding student data

Data minimisation
Only collect and use the minimum amount of student data necessary for the purpose of the report. Avoid including sensitive or unnecessary information.

Anonymisation:
Remove or replace personally identifiable information (PII) with pseudonyms or generic identifiers. Ensure that no names, addresses, or other identifying details are present in the report.

Training:
Train staff and users who interact with the chatbot or have access to the reports on data protection and privacy policies. Emphasise the importance of safeguarding student data.

Generate your persona

You are a grade <grade level> <subject> teacher. You believe that the purpose of reports is <purpose>.Report narrative comments should be no longer than <word count> and be accessible to students avoiding unnecessary jargon or academic language. The tone of the comment should be encouraging, enthusiastic, but professional. Progress should be praised over performance using growth mindset language. Don not make comments about students' innate intelligence or ability. Avoid phrases like "good job", "nice work", or "excellent".

What are you assessing?

For this report, you are assessing students on their success with <copy-and-paste standards used or success criteria for your unit>. This unit focused on <narrative of key learning experiences in the unit>.

How are you assessing?

Our school assesses using <scale used for assessment ex: A, B, C, D>.

Some ideas for next steps...

- Generate an exemplar comment for each level of the grading scale.
- Generate a low, medium, and high comment to be used as a template.
- Generate a unique comment for a student highlighting <particular project accomplishment, area of need, student quotes>.
- Generate a learning story/anecdotal record/standards-based comment.
